

# The structure of the program

Week 5

# The structure of a program

- It is a good idea to write all functions in the beginning of the file.
- The order of functions has no importance in Python.
- The **main program** is where the program execution starts and may include calls to the functions.
- It is a good idea to write a comment to mark the beginning of the main program.
- It is also a good practice to add comments to your program.

**File:** `example_with_menu.py`
