

MATRIX

MATRIX

List of list is usually called **matrix**.

```
M = [[1, 4, 5], [-5, 8, 9]]
```

» There are two **rows**:

» M[0] equals [1, 4, 5]

» M[1] equals [-5, 8, 9]

» The elements in **columns** are using the second index.

» Therefore, M[1][0] equals -5

» The type of the matrix is 2 x 3 (nr. rows x nr. columns)

1	4	5
-5	8	9
